

CLOUD LAVA

云沧岩

CLOUD LAVA 云沧岩

Originating from the movements of the Earth's crust millions of years ago, the collision of volcanoes and oceans solidified into rock. Capturing the details of swirling mist, the tension of rushing waves, and the profundity of overlapping rock layers, it is as if mountains and seas are condensed within a small space.

源于亿万年前地壳涌动，火山与海洋的碰撞凝固成岩。捕捉云雾缭绕的细节，沧浪奔腾的张力，以及岩层叠错的深邃，仿佛将山海凝固于方寸之间。
